Art Unit 1713

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5-8, 10-12, 14-17, 19, 20 and 22-30 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Oshima et al., U.S. Patent 5,532,068.

The rejection as set forth in Paper No. 8 is withdrawn in view of the closer prior art now of record.

The Oshima et al. patent shows resin composite compositions which are based upon applicants' instantly claimed resin components. See specifically column 2. The instantly claimed fillers are shown at column 4 lines 13+. It is maintained that the fillers read on applicants' instantly claimed colorants and as such, these ingredients are seen to render obvious both ingredients B and C as claimed. The vulcanizing agent is shown at column 4 lines 1+. Odor masking agents are rendered obvious by the incorporation of the plasticizer compounds which are seen to be aromatic compounds. As such, these ingredients render

obvious the instantly claimed functional ingredients. Applicants' claim language which identifies the texture and/or look or feel of the molded articles so as to resemble clay or terra cotta are seen to be rendered obvious by this patent. It is questionable just as to how limiting these requirements are in that these are subjective properties and one of ordinary skill in the art would consider articles formulated from the resin compositions as shown in the prior art as having the look or feel of clay or terra cotta.
